A14 DENIM DESIGN & PRODUCTION

www.a14.com.tr

A14 Denim is the innovation of in-house Design and R&D departments by Aközbekler. With this development, we are now creating and producing our own collections for global retail brands backed by 30 years of local and international production experience.

Our mission is to create and provide the highest quality both in design and production. A14 works on new innovations in denim offering to our clients not only the best quality but also competitive prices.

We now have a new factory in the South East of Turkey (Şanlıurfa), with an **IN-HOUSE production** capacity of 150.000 pcs/monthly from cutting to final shipment. **With this new factory we are able to produce large volume orders at competitive prices.**

Aközbekler Textile started life in 1983 in Istanbul as a family-owned business. Upon trademark registration of the brand 'Superstar Jeans' we started the production of our own denim jeans collection. In a short time we developed a large customer base within both domestic market and neighboring countries through combining global fashion trends with high quality production standards. We ended the production of Superstar jeans in 2006 in order to focus on manufacturing denim and non-denim goods for international brands.

Our company is constantly monitored by independent audit firms in terms of social compliance such as **BSCI**, **Sedex** which are all rated high levels. (Our BSCI audit rating is B)

We are aware of our all responsibilities regarding social compliance in terms of our employees, suppliers and environment; we fulfill the requirements by establishing sustainable systems.

A14 Design Team is working on creating fresh styles and washes for both Mens & Womens denim and non-denim collections, working closely with the sales team to determine current global trends and realize customer needs.

Design Team also works together with **R&D** Department to interpret trends and experiment with new ideas and techniques for washes at our own in-house laundry.

Our Product Range is Denim and Non-denim pants, jackets, shirts and shorts. We are mainly focused on pants but we also accept jackets and shirts developments and production up to 20 % of the total.
